PROJECTS

PerfumeBot (Reddit Bot)

- A Python bot made using the Reddit PRAW API and Twilio Messaging API. This bot was designed to provide an automated flaring system, report handling, new user interactions, and duplicate post detection. Interaction with Twilio API allows for quick and easy troubleshooting and debugging.

Stickee Notes

- Stickee Notes is a web based "sticky note" app. Designed to be a simple and effective way to create small reminders Stickee Notes allows the users to input and search any of their notes with ease. Stickee Notes is a front-end only project making use of HTML, CSS, JS, and JSON.

Community Connection

- A freelance website that uses HTML, CSS, Bootstrap 5, JS, and PHP. Provides a contact form to receive emails via PHP mail() for easy communication with potential clients, and a flexible template for the company to fill with their own information and images. The website will be hosted via a LAMP digital ocean droplet to support further development of their own personal platform.
